high speed flexibility

HIGH SPEED EDGE MULTIPLEXER with optional ISDN or PSTN Backup

PRODUCT INFORMATION

ER4420 EDGE MULTIPLEXER

The ER4420 provides a superb wireless WAN solution with vast scalability supported by four built in 10/100BaseT Switch ports and two serial ports.

An integral GSM modem provides GPRS, EDGE and CSD capability enabling high speed wireless communications via a mobile network operator and Sarian's unique Dual SIM technology ensures that a second network can take over if the primary fails.

A unique feature of the ER4420 is the ability to have either an ISDN or PSTN (analogue) modem integrated within the unit which can act as inbound or outbound interfaces.
