superfast flexibility

ULTRA HIGH SPEED 'SUPER 3G' MULTIPOINT ROUTER

PRODUCT INFORMATION

HR4420 HSDPA MULTIPOINT ROUTER

The HR4420 provides an ultra high speed wireless WAN solution with vast scalability supported by four built in 10/100BaseT VLAN Switch ports and two serial ports.

An internal wireless modem provides GPRS, EDGE, 3G, HSDPA (and optional HSUPA) capability enabling incredible wireless communications speeds via a mobile network operator. Sarian's unique dual SIM technology ensures that a second network can take over automatically if the primary fails.

A unique feature of the HR4420 is the ability to have either an ISDN or PSTN (analogue) modem integrated within the unit which can act as inbound or outbound interfaces.
